PART I

Under this section the State party is requested to submit in written form additional and updated information, if possible before 6 April 2009

1. The lack of coordination between the various public services was identified on a number of occasions in the report (CRC/C/NER/2) as posing an obstacle to the implementation of the provisions of the Convention on the Rights of the Child (“the Convention”); please indicate the measures envisaged to remedy this situation. Please also indicate the measures taken or envisaged to improve the functioning of the Committee for the Survival, Protection and Development of Children and the resources available to it to carry out its role of supervising and implementing children’s rights.
2. Please provide additional information on the powers and resources of the Department for the Promotion of the Rights of Women and Children established under the National Commission on Human Rights and Fundamental Freedoms, in particular its capacity to receive complaints.
3. Since the adoption in December 2007 of Act No. 2007-30 on birth registration and the national civil registration policy, please indicate the measures taken to facilitate rural communities’ access to civil registry offices and, in particular, those measures targeting communities in the most remote areas. Please also indicate the measures taken by the State party to support the decentralized administrative units responsible for birth registration.

4. Please briefly describe the situation of children in the Mahamid community, which has been established in the Niger for decades but continues to have an unclear legal status.
5. Please inform the Committee of any initiative to combat harmful traditional practices such as those that occur in Koranic schools, including corporal punishment.
6. Please provide information on the situation of children living in slavery-like conditions, public information campaigns on the new provisions of the Criminal Code on slavery and prosecutions brought against those who continue to keep people in slavery and on the reintegration and rehabilitation of victims, including the civil registration of freed children.
7. With reference to paragraph 38 of the report, please specify which measures intended to prevent births are considered to constitute the crime of genocide.
8. Please inform the Committee about the level of water reserves and indicate whether the State party has reviewed its national plan for water and sanitation. If so, what measures have been enacted with a view to urgently increasing access to drinking water and sanitation services?
9. Please indicate the children's issues that are considered as priorities for implementation of the Convention.
